

Creating your InterpretersLive! Web page Guide

Below is all the information required to set up the new look web pages.

We strongly advise you to add the VRS Link on your main website landing page.

An example can be found here: [Addingham Surgery](#)

Example of what you could add to your GP practice website:

'British Sign Language (BSL) users can contact us using a BSL video interpreter through InterpretersLive!, provided by Sign Solutions.

InterpretersLive! is available when you need it, 7 days a week between (insert your opening hours).

[Click Here for a British Sign Language Interpreter through Interpreters Live!](#)

For troubleshooting and how to download the InterpretersLive! please visit:

<https://www.interpreterslive.co.uk/app/>

How to create the Click to connect button?

To create your '**Connect Now**' button, embed your unique link into a clearly labelled image. You can either use one of the images, we have provided or create your own.

Unique Link: <https://connect.interpreterslive.co.uk/vrs?ilc=WYICB>
